

## Mailing with Ruggero Santilli – looking for Prof. J.V. Kadeisvili

In this document you'll find my email correspondence with people from the Institute of Basic Research, founded by Ruggero Santilli. The messages were sent between April 1<sup>st</sup> 2012 and May 2<sup>nd</sup> 2012. My aim was to find out whether JV Kadeisvili is a real person or, as I suspect, an alias of Ruggero Santilli. My interest in the 'person' of Kadeisvili stems from a very strange rebuttal he wrote to an article by Prof. Calo, which in turn demolished an article of Ruggero Santilli. All these articles were printed in the *International Journal of Hydrogen Energy*.

The correspondence confirms me in my idea that most people supposedly involved with IBR, the Santilli Foundation and the International Committee on Scientific Ethics and Accountability are actually aliases of Santilli. The persons concerned are: Jerdsey Kadeisvili, George Weiss, Richard Andersson and Richard Cox.

The emails below are only edited by deleting the texts of the original mails in case of replies. Also I left out some long lists which were copies from texts found on the websites from the organizations controlled by Santilli (indicated as such and link provided). My remarks which were not part of the original emails are in red. The emails are sorted chronologically, but consist of three separate threads.

Subject: request for information about Prof. Kadeisvili

Dear Sir/Madam,

I plan to write an article about different theories concerning HHO-gas. Ofcourse this cannot pass without giving attention to Mr. Santilli's article *A new gaseous and combustible form of water* in the International Journal of Hydrogen (Vol. 31, 2006). This article received a harsh attack by Prof. Calo in the same journal, but was defended by Martin O. Cloonan and J. Vladimir Kadeisvili. About almost all the persons involved in this discussion I can find plenty of information, but I find it difficult to get some background of prof. Kadeisvili, who wrote the article *Rebuttal of J.M. Calo's comments on R.M. Santilli's HHO paper*.

As he is connected to the Institute for Basic Research, I assume that you can easily get me a his CV, publication list and perhaps a photograph which I can use for my article. If possible, can you also provide me his e-mail address so that I can connect to him directly?  
Your help would be most welcome,

With kind regards,

Pepijn van Erp

i-b-r <basicresearch[at]i-b-r.org>  
to Martin, me

Subject: Re: request for information about Prof. Kadeisvili

Dear "Mr." Pepijn van Erp,

We would gladly cooperate not only by putting you in touch with Professor Kadeisvili (who is interested in direct exchanges with you), but also to provide you samples of similar gases (at no cost) for measurements before you throw any mumbo-jambo conceptual gyration, as well as copies of ongoing scientific and industrial developments in the field that are now receiving millions of \$\$\$ invested from the industry (see attachment)!!! while the field is completely ignored in academia!!! to their evident peril!!!

However, before doing so, we want to know who are you, perhaps by providing us your CV. We also request the email of **Mister Calo (mister because he wrote a note of criticism on Prof. Santilli HHO paper with zero technical knowledge in the field - something serious scholars certainly do not do!)** so that he can receive copies of the correspondence since we do not do thin gs in the back.

Additionally, we want to stress that your evident suppression of scientific democracy did hit me in the eye, by carefully calling Cale "Prof." while calling the discoverer of the new species, Prof. Santilli, as "Mr.", and reaching the much offensive absence of any title for Martin Clonan, a real Professor in Ireland.

Therefore, I have to stress that here in the United States of America we have scientific democracy and guys who do not understanding it for political reasons come out quite damaged. At any rate, Professor Santilli is immensely more qualified than Mister Calo because basic discoveries in mathematics, physics and chemistry

<http://www.santilli-foundation.org/>

<http://www.world-lecture-series.org/>

hundreds of nominations for the Nobel prize both in physics and Chemistry, the award of the Mediterranean Prize (granted to Hilary Clinton, President Sarcozy, Kings of Monaco and Holland, etc.)

<http://www.santilli-foundation.org/santilli-nobel-nominations.html>

Finally, in the eventuality you might have some serious scientific aim beyond your evident political defense of a scientifically vacuous note (which i exclude at this point due to your biased aprioristic support of **Mister Calo**, you should first attend our forthcoming Post Ph. D. Seminar Course in Hadronic Chemistry, where the issues will be treated by luminary in chemistry and physics (see below outline) and then [perhaps; after that knowledge dare to issue a SCIENTIFIC opinion on HHO without vacuous gyrations.

Yours, Truly

[with silent copy to Professor Kadeisvili)

Subject: Re: request for information about Prof. Kadeisvili

PS. I forgot to alert you that the publication of any scientifically motivated criticisms on Professor Santilli new species of HHO will be receive appreciation and respect, but you must be made aware that nowadays, following the millions of dollars of investment in the field any scientifically unmotivated support of Mister Calo trash will very likely meet response in court because, unlike equivocal academicians solely surviving on equivocal grounds, industrialists hit hard when unjustly damaged in their pockets.

To be straight, rather than defending your body guy Calo, you will drag him into a lawsuit for blatant scientific corruption..... law suits certainly NOT filed by me or by Professors Santilli, Cloonan and Kadeisvili, but BY THE INVESTORS TO DEFEND THEIR MONEY.

Subject: Re: request for information about Prof. Kadeisvili

Dear Dr. Weiss (I hope that's the correct way of addressing you),

Please don't make any assumptions based on my inappropriate addressing of Prof. Santilli and Prof. Cloonan. The bias, you see in that use, was not intentional. In the Netherlands we're a little less formal in these matters.

I'm still interested however in a CV of Prof. Kadeisvili, because until now I could only find that he is probably from Georgia (the country) and born in 1959. Amongst other things I'm interested at which universities he studied, got his degree and his PhD.

As far as my background, I think the only thing that really matters is that I have a degree in Mathematics. But it's been a while since I've used mathematics in such a way that I can read the articles of Prof. Santilli and Prof. Kadeisvili and understand those. My specialization is more in the field of statistics and number theory.

Currently I'm trying to see if I can do some freelance work as a science journalist. So that's why I'm interested in the story.

By the way, I'm a bit surprised that you mention that already millions are invested in this field. Does this concern the development of applications of HHO gas or does it concern the existing Magnegas-company. I thought these things were related because Prof. Santilli claims that in both cases the gases formed consist of 'magnecules', but Magnegas is not HHO gas as far as I could see. But maybe you can correct me if I'm wrong.

With kind regards,

Pepijn van Erp

PS1 the email address of Mr Calo can be found easily and he's not my 'body guy'.

PS2 I'm not interested in the generous offer of the samples, because I wouldn't be able to have them tested by lacking the facilities.

Subject: Erp's serious cience or blabbling??

Mr. Erp, you want to write an article on Prof. Santilli's new chemical species of magnecules?? Come on !! You do not have the knowledge. In the event you and mister Calo had a minimum of science in mind you would repeat the measurements first before blabbling. At any rate, I provide it below in the event you are not scamming.

YT

JVKadesivbii

=====  
COPIED FROM ANOTEHR CORRESPONDENCE

Since you do not appear to be aware of the technical literature, I suggest that, as an introduction, you should start with an inspection of the **nontechnical** outline

#### **THE NEW FUELS WITH MAGNECULAR STRUCTURE**

**Ruggero Maria Santilli**

International Academic Press (2008)

200 pages

Available in free pdf download from the link

<http://www.i-b-r.org/docs/Fuels-Magnecular-StructureF.pdf>

Italian translation by **Giovanna Bonfanti and Michele Sacerdoti**,  
published by **Editori Riuniti, Roma, Italy**, and available at

[I Nuovi Carburanti con Struttura Magnecolare](#)

Russian, Chinese et al translations available.

To achieve a technical knowledge you should then start with a study of the novel Santilli isomathematics that will be presented by mathematicians at the Seminar Course in hadronic Mechanics.

After learning the new mathematics, you should study the volume

***Foundations of Hadronic Chemistry, with Applications to New Clean Energies and Fuels,***

**R. M. Santilli, Kluwer Academic Publishers (2001),**

<http://www.santilli-foundation.org/docs/Santilli-113.pdf>

also with translations in Russian Chinese, etc.

Then you are in a position to reach a serious scientific judgment on  $H_n$ ,  $n = 2, 3, 4, 5, \dots$

As one of the many applications, I attach for your knowledge a paper by Prof. Santilli published in Oxford, England, in 2003, on his discovery of  $H_n$  (universally acknowledge new chemical symbol

MH), with the attachment at the end of independent chemical analyses establishing that the species is 99.8% hydrogen, yet its specific weight is a multiple that of H<sub>2</sub>.

I then add one of several additional independent measurements of a similar species produced by Prof. Santilli - now under organization for INDUSTRIAL production !!! while still remaining vastly unknown in the US academia to its evident peril !!!! while Prof. Santilli's discovery are well known to foreign academia !!!!!, resulting in being at least 99.5% hydrogen, yet its specific weight is about FOUR times that of hydrogen.

By recalling that hydrogen has ONLY ONE VALENCE ELECTRONS, and by nothing that such multiple specific weight can only be achieved via a combination of H<sub>2</sub>, H<sub>3</sub>, H<sub>4</sub>, ... H<sub>n</sub>, - as established by gas chromatography in any case - the evidence here attached trashes out as academic parlance without scientific content any belief that Santilli's new species of heavy hydrogen has a "molecular" structure, that is, a valence bond. Please understand and admit the novelty of the species.

=====

MR. ERP, IF YOU ARE SERIOUS YOU SHOULD FIRST ATTEND THIS POST PH D SEMINAR COPURSE AND THEN DO BLABLING. IF YOUI WANT TO ATTEND, I SHALL MAKE SURE WITH PROFESSOR SANTILLI YOU ARE ACCEPTED.

Subject: Re: Erp's serious cience or blabbling??

Dear Professor Kadeisvili,

Thank you for writing me in person. My purpose in writing the article is to give a decent overview of the different theories concerning HHO-gas. And ofcourse to be able to present the evidence in a fair way, I would like to give the different authors a fair description. That's why I wrote to the IBR and Santilli foundation in the first place, because I could not find your CV.

I would be most grateful if you could send it to me. I already got the list with publications you provided me in your e-mail, but it's lacking the information I'm most interested in: your background as a scientist. Simple questions like, where are you from?, where did you get your education?, where did you get you PhD? what's the title of your thesis? and so on.

I wouldn't think these are very hard questions to answer and I hope you can provide me with that kind of information.

With kind regards,

Pepijn van Erp

Subject: Re: request for information about Prof. Kadeisvili

Mr. Santilli,

It's quite clear to me now that this whole business of yours is a complete fantasy. There is no Professor Kadeisvili (who cannot even spell his own name right!), no Mr. Anderson, no Mr. Weiss and no Mr. William Pound (of whom you already mentioned that it is a pseudonym, well I think it's clear that it is a pseudonym of Ruggero Santilli).

Your MagneGas business looks very much to a Ponzi scheme to me. I wonder whether you managed to get investors for the \$3,882,500 you tried to get in your recent sell of common stock.

I'm not sure whether I will take this matter any further, but you'll probably notice via other routes than direct communication.

Yours truly

P. van Erp

Subject: The returned defecations

Dirty man,

Prof. Kadeisvili provide you quite nicely various scientific information and references on Prof. Santilli's magneucles and their industrial applications, and also invited you to be part of their forthcoming course on hadronic mechanics, and you answer with this filth below! You are a dirty filthy puking man in great need of some legal fixing for which our Committee has been set forth and fully funded, that's what we do, fixing human filth in science, and here is part of the action going on to fix you.

Our specialized Investigative Agency on scientific filth that includes former CIA operatives has already "bugged" your computer and is now collecting info to identify your real name, affiliation and ethnic connotation. The Law Firm of the Magnegas Corporation, a publicly traded US company under strict SEC scontrols you have defecated on without evidence, is already poised to strike legal action against you and your filthy friend mister calo. The Law Firm of our own Committee is collecting info to provide you, your affiliation and your friends a beautiful and unforgettable legal fixing they specialize in - that cannot be delivered by the law firm of a US public company .... -, and our investigative agency is contacting the FBI because your behavior is the same as the criminal conduct that preceded the assassination of the former MIT scientist Dr. Eugene Mallove, which assassination from emerging evidence was perpetrated by an alleged mandate from your brothers at MIT, and the killing was allegedly done by masada agents who entered America with various diplomatic passport (to change name from flight to flight), all this is just about to be released by the FIB as well as our Attorney General to the American people and the world following five years of investigations and huge political pressures to cut out the nazis who do not want the American people to have the information they own. Special security and recording means have been implemented around Prof. Santilli because he did receive life threats in the pas from your organized crime.

As far as I am concerned as soon as our investigative agency has provided proof of your real name and ethnic affiliation [I already know this from your imprint of human filth] I will do with great zest the only thing you and your people deserve: I will return your courtesy and will defecate on your name and on your people in the internet, FaceBook etc. the various blogs, etc. This is the only message you will receive from me, hence hereon look at the internet under your real name for the returned defecation you deserve. As Professor Kadeisvili put it with gentle language very inappropriate for your filth "you are a threat to America and mankind."
